Encon IT

Small Business

"I don't have enough hands!"

That is a phrase that we often hear. A small business has grown past their capacity to efficiently manage their own IT environment. The "IT guy," aka owner, is pulled too thin and struggles with the time needed to tend to IT issues. We are a small business's third hand. We specialize in effectively managing the IT environment for small businesses. And, we are cost flexible in that we work with all sizes of budgets. The bottom line…we work with each company to customize the IT environment to reach maximum benefit on cost conscience budgets.

Services Offered:
- ➢ Server & desktop management
- ➢ Onsite and remote tech support
- ➢ Backup and disaster recovery / Business continuity
- ➢ Software migration projects
- ➢ Mobile phone management
- ➢ Encryption services
- ➢ Remote access management
- ➢ Hosted VoIP solutions

For a free evaluation of your IT environment, contact us at

Just when our firm was ready to give up on the 21st Century and Information Technology, we found Encon IT. We had a meeting with them about our structure, our frustrations, our needs and our budget. Shortly thereafter they met with us again with a proposal and a great strategy to get us on track again. They never talked "over" us, they never made us feel like we were uninformed or ignorant, their pricing wasn't like building the Taj Mahal, they simply worked with us. Today we are up and running better than we have been in two years! Continuing support and patience with our firm staff is wonderful.

Thank you Encon IT for taking the time that we needed to get just WHAT we needed! – Jean Anne, Dallas Law Firm
